

## Let's carry TOMICA to the top floor by the elevator!

- 1 Spin the handle to lower the elevator down to the bottom and load your TOMICA manually!

- 2 Spin the handle to rise or lower the elevator. Try to stop it at the 2nd or 4th floor position.

- 3 Upon arrival at each floor, use the knob on the left of the elevator to unload your TOMICA.

This photo shows the 4th floor. You can play the same way at the other floors.

- 4 Load your TOMICA back to the elevator and lower it to the 1st floor. Press the knob on the right side of the elevator to exit your TOMICA!

## Launch your TOMICA!

- 1 Push the lock switch on the 2nd floor backward as shown in the photo. It will release three TOMICA from the 4th and 3rd floor to the 'Simultaneous Auto Exit' to make them stop.

- 2 Pull the lock switch toward you. Your TOMICA will exit the park in a row.

- 3 Roll your TOMICA manually, and TOMICA will exit through the ramp at the front side of the building.

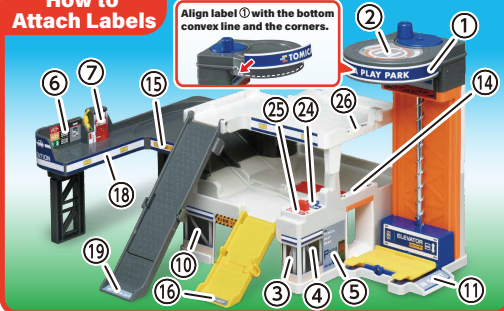

### How to close the floor / How to open the floor / How to label the stickers

\* Please refer to the photo and attach labels in accordance with the corresponding numbers.

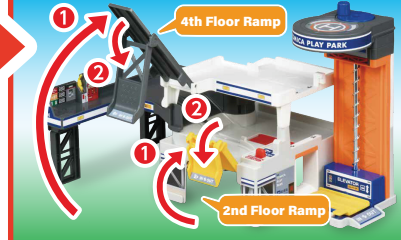

#### How to Attach Labels

Align label ① with the bottom convex line and the corners.

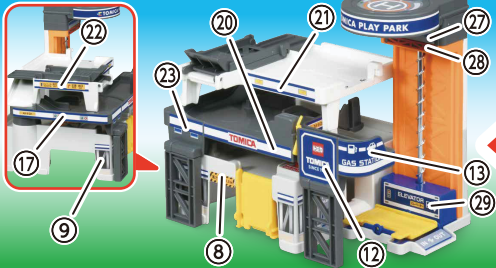

#### How to Close

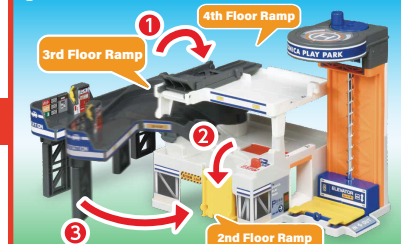

- ① Lift the 4th floor ramp and 2nd floor ramp up.
- ② Fold them into half.

#### Closed State/How to Attach Labels

- ① Fold the ramp and fit it with the 4th floor.
- ② Push the 2nd floor ramp downwards.

\* Reverse the whole procedure to open the set.

- ③ Turn the 3rd floor toward the elevator to close it.

#### Components

Main Unit x1

4th Floor Ramp x1

2nd Floor Ramp x1

Heliport x1

Support Brace x2

Label x1

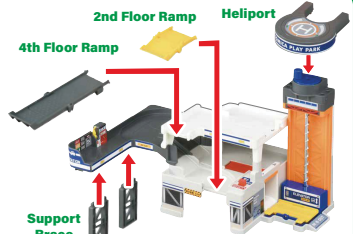

#### How to Assemble Parts

- ① Rotate the 3rd floor sideways to open.

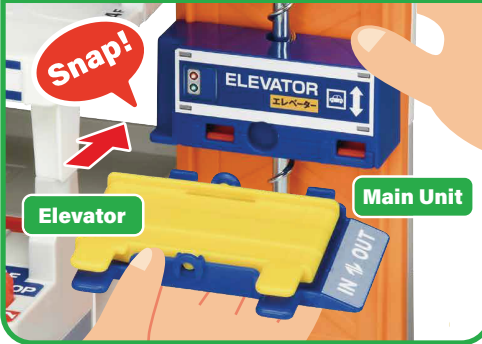

- ② Attach the ramp, heliport and support brace as shown in the photo on the right.

## When the elevator disengages

Hold the main unit from behind with one hand and push the disengaged elevator straight in from the front.

※ Be careful not to get your hands caught.

## When the red ramp disengages

Push the red ramp down manually and "click" it into the slot.
